

Bayswater / Chelsea grate fitting instructions

The grate in your Bayswater / Chelsea stove has a different design to that mentioned in the installation guide.

Please follow the instructions below to install your grate.

Step 1

Place the grate bed on the floor in front of the stove, not inside the stove at this stage, with the cut-outs to the rear.

Step 2

Fit the bars into the grate with the long, plain end first. For Bayswater stoves the long end should be pointing toward you and the opposite for a Chelsea stove.

Step 3

Lower the bar into position.

Step 4

Slide back into the casting. Repeat for the remaining bars ensuring that all the parts can slide back and forth freely.

Step 5

Place the grate assembly into the stove making sure not to disturb the riddle bars, and that the rocker arm is swung into its highest position.

Step 6

Lower the grate on to the grate bar supports, making sure all the riddle bars engage with the rocker arm. This is most important as the riddle will not work unless seated correctly.
